

Please reconsider the needs of the deaf people for their communication needs. We need to have access to the best interpreters to access anyone we need to contact the same way the hearing people are able to do. We have appreciated the support of the many opportunities given us. Please bring back the money support that was available before so the quality of services can continue. It not only benefits the deaf, but it also is a benefit to the hearing people. Sometimes people forget this. Thanks for listening.
